COORDINATED FLEET VIEW

SYSTEM

CLASS:	MULTI-UAV GROUND CONTROL & COORDINATION
FLEET SCALE:	SCALABLE UP TO 200 UAVS
CONTROL LEVELS:	FLEET / GROUP / INDIVIDUAL AIRCRAFT
FLEET TYPE:	HETEROGENEOUS — MIXED AIRFRAMES & PAYLOADS
OPERATOR:	SINGLE OPERATOR, ONE MAP, ONE ROSTER
FORMATIONS:	SHAPES, SCALE, ROTATION — OUTLINE OR FILLED
SAFETY CAGE:	CONFIGURABLE RADIUS & HEIGHT (M)

CORE CAPABILITIES

SCALES TO 200 AIRCRAFT UNDER A SINGLE OPERATOR
 HETEROGENEOUS FLEET INTEGRATION
 UNIFIED MAP-FIRST OPERATING PICTURE
 DYNAMIC TEAMING — GROUP, DIVIDE, RECOMBINE IN FLIGHT
 CENTRALISED COORDINATION WITH DISTRIBUTED FALLBACK
 COMMON CONTROL & TELEMETRY LAYER
 OPERATIONAL LOGGING OF FLEET & SAFETY EVENTS

COLLISION AVOIDANCE

- CONTINUOUS HORIZONTAL & VERTICAL SEPARATION MONITORING
- EVASIVE BEHAVIOUR AS AIRCRAFT APPROACH THE SAFETY BOUNDARY
- ACTIVE THROUGHOUT COORDINATED FORMATION CHANGES
- EVASION EVENTS RECORDED IN THE SYSTEM LOG

LIVE FLEET AWARENESS

CONNECTION STATE | POSITION & ALTITUDE | FLIGHT STATE
 BATTERY INFORMATION | PER-AIRCRAFT GPS STATUS

Accel Swarm Command holds a mixed fleet of unmanned aircraft together as one coordinated force from a single operating position. Aircraft differing in size, payload and mission role are brought onto one map and one roster, assembled into task groups and shaped into formations, while any individual vehicle remains visible and directly controllable — with a configurable safety cage keeping them apart throughout.

One GCS. One Operator. Multiple Missions — simultaneously orchestrating ISR, munitions dropping, precision and kinetic strikes, C-UAS operations, formations, and autonomous mission workflows from a single unified platform.
